THE SERVICES COMPANY THAT WORKS FOR YOU...

ASSET LIFECYCLE & INVENTORY MANAGEMENT

MANAGED SERVICES OVERVIEW

Helping organisations manage the lifecycle of hardware and software assets

Our Asset inventory Managed Service is a set of scheduled activities to ensure organisations assets are being managed and controlled effectively throughout the lifecycle of the asset, from acquisition to retirement for all hardware and software.

What's Included?

This will be achieved through the following key activities:

- Baseline import of vendor licenses and agreements
- On-going importing of license purchases
- High level risk and optimisation report on up to 5 vendors
- Regular asset inventory reporting identifying status of assets
- Quarterly Service Reviews

This will allow organisations to:

- Confidently have the assurance that assets are being effectively managed and protected
- Provide opportunities for optimisation of assets and potential savings
- Manage any considerations, implications and risks associated to the assets
- Assist you in making informed commercial decisions and understanding total cost of ownership

Baseline your assets

Manage and control

**Optimise your SAM
Tool investment**
